

*We Can Restore Your Roof to its Original Beauty*

# ROOF CARE™

- **State-of-the-art Low Volume Low Pressure (LVLP) technology**
- **Cleans, brightens and restores to original beauty**
- **Environmentally safe, non-toxic, biodegradable**
- **No high pressure washing with bleaching agents**
- **Retards the regrowth of mold and mildew**

# Let Us Restore & Maintain Your Investment

**FACT:** Until now the only method of curing an ugly roof was cleaning with high pressure, spraying with high toxic concentrations of bleach or expensive replacement.

**Before**

**After**

## ADVANTAGES of ROOFCARE

- Low Volume Low Pressure won't damage a roof
- Is safe for using around plants, pets, children
- Cleans and restores to original beauty
- Environmentally safe
- Retards the regrowth of mold, algae and fungus
- No rusting of metal gutters
- Will not leave drip marks

## DISADVANTAGES of HIGH PRESSURE WASHING/BLEACH or CHLORINE

- High pressure can damage a roof
- Damages or kills plants, unsafe for use around pets and children
- Bleach can fade the color of roof and only bleaches the dirt
- Environmentally unsafe
- Does not retard the regrowth of mold, algae and fungus
- Metal gutters around the house will start rusting
- Will leave drip marks
